## PLANTS

- Amaranthus
- Anigozanthos
- Asparagus
- Asplenium
- Begonia boweri/coccinea/rex
- Beloperone
- Calocephalus
- Capsicum
- Carex
- Carropegia
- Chrysanthemum
- Coleus
- Crassula schmidtii
- Echeveria
- Hebe
- Hedera
- Helichrysum
- Heuchera
- Hoya retusa
- Kalanchoe beharensis/tomentosa
- Maranta
- Nematanthus
- Nepenthes
- Pachystachys
- Peperomia
- Phlebodium
- Pilea
- Pteris
- Sarracenia
- Scindapsus
- Sempervivum
- Vanilla planifolia

## AUTUMN 2011

Nature is an important source of inspiration for us in this season, which can sometimes feel rather turbulent. In Forest Delight, the forest and the conservatory contribute to a romantic interpretation of nature. Birds, feathers, forest floors, moss, trees, leaves and branches, and even microorganisms are all elements that form part of the theme. The expression is idyllic and romanticised, using forest and natural materials with an either finished or rustic appearance, in such a way that nature is still recognisable in them. The focus is on green plants or coloured plants in the shades of the palette.

The colour palette consists of forest greens and deep brown tones, illuminated by golden yellow and burnt ochre highlights. To this range we add light brown shades, and a sandy colour which is primarily used for bases and styling.
